IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

DETAILED ACTION

Response to Arguments

Applicant's arguments, see pages 9-12, filed 25 November 2008, with respect to the rejections of the claims under 35 U.S.C. § 103(a) have been fully considered and are persuasive. The rejections of the claims under 35 U.S.C. § 103(a) have been withdrawn.

Firstly, parallelizing a software application necessarily requires parallelizing the application among processors since the software code is inherently meant to be executed upon processors. Otherwise, there is no need for parallelization. However, while the Load-Balancing Sub-Task Executer (LOBSTER) taught by Gulko (US-2003/0177240 A1) distributes the processing among a master processor and slave processors according to various policies (such as load balancing of processes to be executed), said policies are not policies that are stored in association with the one or more tasks. In other words, the policies are not strictly related to the one or more tasks to be executed, but are related to the capabilities of the various processors comprising the parallel network. Accordingly, Examiner agrees with Applicant that Gulko does not fully teach what is lacking in Sugiyama (US-6,633,723). Further, Examiner has not discovered any additional prior art which fully teaches any of the independent claims and/or renders any of the independent claims obvious to one of ordinary skill in the art at the time of the invention. Therefore, the present application is in condition for allowance.

Allowable Subject Matter

Claims 1, 3-37, 57 and 59-62 are allowed.

The following is an examiner's statement of reasons for allowance:

Art Unit: 2625

Independent claim 1 recites a printer for printing time-based media. The printer comprises: (1) an embedded media processing system which generates an electronic representation of the time-based media; (2) an electronic output system which produces a document on a media based on the time-based media; (3) a housing; (4) an embedded resource allocation module which allocates the processing tasks among the printer and an external processing system; and (5) a task policy manager which determines whether the printer interacts with the external processing system as a master processor or slave processor to process the one or more tasks, the determination depending on a stored policy relating to the one or more tasks. This system is advantageous since it allows the printer to efficiently parallelize its computational operations according to the kind of time-based media processing that is to be performed by relying simply on what is already stored, rather than having to compute a parallel processing optimization before continuing. The closest prior art discovered is the previously cited combination of Sugiyama in view of Gulko. However, the combination does not teach that the master/slave interaction is determined by a policy stored in association with the one or more tasks to be performed. Examiner has discovered no additional prior art which anticipates claim 1 and/or renders claim 1 obvious to one of ordinary skill in the art at the time of the invention. Accordingly, claim 1 is deemed allowable.

Claims 3-37 each depend from claim 1, either directly or ultimately, and are therefore also deemed allowable at least due to their corresponding dependence from an allowable claim.

Independent claim 57 recites a method for printing time-based media. The method of claim 57 contains the same allowable subject matter found in claim 1. Therefore, claim 57 is deemed allowable for the reasons provided for claim 1.

Claims 59-62 each depend from claim 57, either directly or ultimately, and are therefore also deemed allowable at least due to their corresponding dependence from an allowable claim.

Art Unit: 2625

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
